Profile

Built real-time and data-driven systems across WebRTC, AdTech analytics, and full-stack platforms. Focused on scalable backend systems, low-latency communication, and production-grade debugging.

Education

B.Tech, Computer Science & Engineering — Christ University, Bengaluru 2022 – 2026
GPA: 3.45 / 4.0

Experience

Technical Operations Intern, Amagi Media Labs Oct 2025 – Present

- Built an automated alerting system integrated with SLAs to streamline issue debugging and control.
- Monitored and troubleshooted **K8s** and **Docker** environments using **Grafana**, **Prometheus**, and **Loki**.
- Managed media workflows using **AWS MediaLive**, **Connect**, **CloudWatch**, **CDN**, and **SNS** to ensure uptime.
- Resolved operational failures by executing standard SOPs, reducing escalation times for critical incidents.

Software Development Intern, Matrix Media Solutions Apr 2025 – May 2025

- Built a full-stack order processing system (**React**, **Express**, **SQL**) handling 100+ weekly orders, reducing manual errors by **70%**
- Implemented real-time tracking workflows processing 200+ daily updates, reducing support tickets by **40%**

Data Analyst Intern, Webrasta Technologies May 2024 – Jun 2024

- Performed EDA using **Pandas** to uncover **25% user growth vs 8% revenue gap**, informing strategy decisions
- Built dashboards using **Matplotlib** for anomaly detection and business insights

Projects

Herd Live — GitHub

Built a peer-to-peer video conferencing system using **WebRTC** and **Socket.io**, enabling low-latency media streaming and real-time synchronization. Implemented the signaling pipeline, **ICE** negotiation, and dynamic video prioritization to optimize bandwidth for a high-performance UI.

Sentinel

Engineered a real-time monitoring and alerting platform using **React**, **Spring Boot**, **PostgreSQL**, **WebSockets**, and **Cloud Messaging**. Implemented live log streaming, RBAC-based authentication, alert history tracking, and rule-based alert generation, enabling sub-second incident detection and scalable debugging workflows.

Finia

Developed an AI-driven personal finance platform using **Next.js**, **Express**, and **MongoDB**, featuring predictive budgeting, expense forecasting, and NLP-based transaction categorization for actionable financial insights.

Skills

Languages	Java, Python, C, JavaScript, SQL
Web & Frameworks	React.js, Node.js, Express.js, REST APIs
Databases	PostgreSQL, MongoDB
DevOps & Cloud	Docker, Kubernetes (K8s), Linux, AWS , CDN
Tools & Observability	Grafana, Prometheus, Loki, Freshdesk
ML / Data	Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV

Activities, Leadership & Certifications

Leadership

- Event Head, **Magnovite (Christ University)** — Led **Tech Trivia (2023)** and **Triwizard Cup (2024)**, managed 20+ volunteers, coordinated inter-university participation and event execution.

Hackathons & Competitions

- Smart India Hackathon 2024** — Developed a Deepfake Detection solution for media authentication.
- Techradiance, IIT Bombay 2023** — Semi-Finalist.

Professional Memberships

- Member, **IEEE** , **ACM**

Certifications

Data Analysis with Python (IBM) | AWS Cloud Essentials (AWS) | OCI AI Foundations (Oracle) | Digital Image Processing (Great Learning) | Infrastructure Economics (NPTEL – IIT Madras) | CCNAv7: Introduction to Networks (Cisco) | Networking Basics (Cisco) | Introduction to Cybersecurity (Cisco)
